

# What is an Area of Outstanding Natural Beauty?

An Area of Outstanding Natural Beauty (AONB) is an area of land that is special and beautiful.

AONBs are looked after carefully because they are important places for the whole country.

AONBs are great places to visit.

There are 34 AONBs in England.

Each one has its own history, culture and wildlife.

## Protected

AONBs are protected. They are protected so that people in the future will be able to enjoy them.

## How are AONBs protected?

In England AONBs are protected by laws to make sure they stay special and beautiful.

For example, if you want to build something, you have to think about the natural beauty of the area.

## How do AONBs work?

AONBs are looked after by:

- The people who own the land.

- Local organisations.

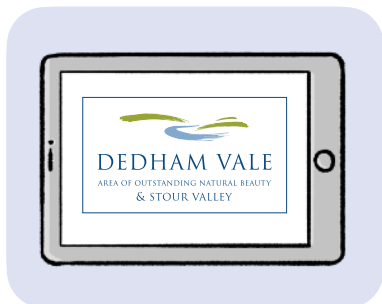

- Local councils.

Each AONB has a plan which says how people will work together to look after and improve the natural beauty of the area.
