Draft Statement of Common Ground	1	DRAFT	Draft Statement of Common Ground with Dedham Vale National Landscape & Stour Valley	03/06/2025
Draft Statement of Common Ground	2	DRAFT	Incorporating comments in from Dedham Vale NL & Stour Valley	

To Note - Comments made in this document by National Landscapes have been made at officer level, and will likely be subject to change following a review by the wider Partnership as the document progresses.

Draft, work-in progress and subject to ongoing review

Abbreviations

Abbreviation	Full Reference
AONB	Area of Outstanding Natural Beauty
CoCP	Code of Construction Practice
DCO	Development Consent Order
DLL	District Level Licensing
EIA	Environmental Impact Assessment
ES	Environmental Statement
LVIA	Landscape and Visual Impact Assessment
NETS	National Electricity Transmission System
PEIR	Preliminary Environmental Information Report
SoCG	Statement of Common Ground
SoCC	Statement of Community Consultation
ZTV	Zone of Theoretical Visibility

1. Introduction

1 Introduction

1.1 Overview

- 1.1.1 This draft Statement of Common Ground (SoCG) has been prepared by National Grid Electricity Transmission plc (referred to as National Grid within this document) and the Dedham Vale National Landscape & Stour Valley (hereafter referred to as the 'National Landscape'). It identifies areas of the Norwich to Tilbury Development Consent Order (DCO) application (the Application) where matters are agreed, under discussion or not agreed between the parties.
- 1.1.2 The aim of a SoCG is to help the Examining Authority manage the examination phase of the application. Understanding the status of the matters at hand will allow the Examining Authority to focus their questioning and provide greater predictability for all participants in examination. A SoCG may be submitted prior to the start of or during examination and then updated as necessary or as requested during the examination phase.
- 1.1.3 A note on nomenclature. The term National Landscapes is used in this document as the brand name adopted in November 2023 for nationally designated Areas of Outstanding Natural Beauty (AONBs).

1.2 Project Description

- 1.2.1 The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:
- A new 400 kilovolt (kV) electricity transmission connection of approximately 180 km overall length from Norwich Main Substation to Tilbury Substation via Bramford Substation, a new East Anglia Connection Node (EACN) Substation and a new Tilbury North Substation, including:
 - Approximately 159 km of new overhead line supported on approximately 509 pylons, either standard steel lattice pylons (approximately 50 m in height) or low height steel lattice pylons (approximately 40 m in height) and some of which would be gantries (typically up to 15 m in height) within proposed Cable Sealing End (CSE) compounds or existing or proposed substations
 - Approximately 21 km of 400 kV underground cabling, some of which would be located through the Dedham Vale National Landscape (an Area of Outstanding Natural Beauty (AONB1))
 - Up to seven new CSE compounds (with permanent access) to connect the overhead lines to the underground cables
 - Modification works to connect into the existing Norwich Main Substation and a substation extension at the existing Bramford Substation

- A new 400 kV substation on the Tendring Peninsula, referred to as the EACN Substation (with a new permanent access). This is proposed to be an Air Insulated Switchgear (AIS) substation
- A new 400 kV substation to the south of Orsett Golf Course in Essex, referred to as the Tilbury North Substation (with a new permanent access). This is proposed to be a Gas Insulated Switchgear (GIS) substation
- Modifications to the existing National Grid Electricity Transmission overhead lines to facilitate the connection of the existing network into the new Tilbury North Substation to provide connection to the Tilbury Substation
- Ancillary and/or temporary works associated with the construction of the Project.

1.2.2 In addition, third party utilities diversions and/or modifications would be required to facilitate the construction of the Project. There would also be land required for environmental mitigation and Biodiversity Net Gain (BNG).

1.2.3 As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.

1.2.4 The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project will need to comply with design safety standards including the Security and Quality of Supply Standard (SQSS), which sets out the criteria and methodology for planning and operating the National Electricity Transmission System (NETS). This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as those proposed for the Project.

1.3 Format and structure of this document

1.3.1 This SoCG is structured as follows:

- **Section 2** provides a summary of the key engagement undertaken to date with National Landscapes.
- **Section 3** summarises the key matters and captures the status of each issue / matter.
- **Section 4** includes the sign off sheet.

2. Record of Key Engagement

2 Record of Key Engagement

2.1 Introduction

2.1.1 National Grid has engaged with National Landscapes Partnership on the Project throughout the pre-application process.

2.1.2 The National Landscape Partnership is a non constituted organisation set up in 1993 to act as an advocate for the National Landscape. Individual members of the Partnership may express a view expressing their individual organisations aspirations or responsibilities.

2.1.3 This has included:

- Non-statutory consultation in Spring 2022 and Summer 2023
- Statutory Consultation in Spring 2024
- Targeted Consultations in Spring 2025
- One to one / small group technical meetings on specific detailed matters
- Sharing of papers and documentation at key stages Regular ‘Thematic Group’ meetings to discuss specific topics
- National Grid presenting to the National Landscape Partnership

2.1.4 Further details on National Grid’s engagement with stakeholders is provided in the Consultation Report and the Environmental Statement.

2.2 Summary of Key Engagement

2.2.1 Table 2.1 provides an overview of the key engagement that has taken place between National Grid and National Landscapes.

Table 2.1 – Summary of Key Engagement between National Grid and National Landscapes

Date	Format	Topic/Description
July 2022	E-mail	National Grid issued the assessment methodology to stakeholders for review ahead of the Thematic Group Meeting in July 2022.
July 2022	E-mail	National Grid shared the Landscape and Visual Impact Assessment (LVIA) methodology and arboricultural assessment methodology for review

Date	Format	Topic/Description
		and discussion ahead of the Thematic Group Meeting.
July 2022	Meeting	Landscape and Visual Thematic Group meeting – LVIA methodology and arboricultural assessment methodology.
September 2022	Meeting	Attendance at Dedham Vale Area of Outstanding Natural Beauty (AONB) Partnership Meeting.
January 2023	E-mail	National Grid shared plans showing proposed viewpoint locations for review and comment.
February 2023	Meeting	National Grid held a Landscape and Visual Thematic Group Meeting to discuss proposed viewpoint locations in Suffolk. National Grid sought agreement on the viewpoint locations to include in the Preliminary Environmental Information Report (PEIR) and the ES.
April 2023	Meeting	National Grid held a meeting to discuss stakeholder’s feedback on EIA viewpoints previously shared.
April 2023	Meeting	National Grid presented at Dedham Vale National Landscape Partnership meeting
May 2023	Meeting	National Grid presented and discussed the responses to the feedback on the viewpoint locations received from the February meeting. Stakeholders provided feedback on updated and additional viewpoint locations at the meeting and in subsequent correspondence.
June 2023	E-mail	National Grid issued a Technical Note setting out the study area and methodology for assessing businesses where visual impacts are a potential operational consideration and PRoW during construction and operation.
August 2023	Email Correspondence	National Grid issued wirelines and photomontages and proposed the approach to Zone of Theoretical Visibility (ZTV) mapping for comment.
September 2023	Meeting	Meeting to discuss Biodiversity Net Gain (BNG) and potential off-site schemes/initiatives.

Date	Format	Topic/Description
January 2024	E-mail	National Grid shared an update on viewpoints, including ZTV.
April 2024	Meeting	National Grid presented at Dedham Vale National Landscape Partnership meeting
May 2024	Meeting	Optional Statutory Consultation Historic Environment Thematic Groups for Suffolk and Essex North.
May 2024	Meeting	Optional Statutory Consultation Landscape Thematic Group – Suffolk.
September 2024	E-mail	National Grid shared the LVIA methodology and proposed viewpoints.
September 2024	Meeting	National Grid held a Landscape Thematic Group meeting to seek agreement on the LVIA Methodology.
September 2024	Meeting	National Grid presented at Dedham Vale National Landscape Partnership meeting
September 2024	Meeting	National Grid held a Landscape Thematic Group meeting to discuss viewpoints in the Essex North area.
September 2024	Meeting	National Grid held a Landscape Thematic Group meeting to discuss viewpoints in Suffolk.
October 2024	E-mail	National Grid shared the Landscape Thematic Group Meeting presentation and associated shapefiles, landscape viewpoints and order limits.
October 2024	E-mail	National Grid shared updated viewpoint information (follow up from Landscape Thematic Workshops).
October 2024	E-mail	National Grid shared the National Landscape Setting Study with key stakeholders.
October 2024	Meeting	National Grid held a focus meeting on National Landscapes to discuss the findings of the draft National Landscape Setting Study, to discuss and agree LVIA viewpoints and to discuss potential effects on the National Landscape and appropriate mitigation and compensation measures.

Date	Format	Topic/Description
November 2024	Meeting	National Grid held a meeting to agree viewpoint photography locations and photomontages to be used for the ES.
November 2024	Meeting	National Grid held a meeting to discuss approach to targeted consultation.
April 2025	E-mail	National Grid shared the Outline CoCP with the National Landscape.
April 2025	E-mail	National Grid shared the Outline LEMP with the National Landscape.
May 2025	Meeting	National Grid held a meeting to discuss high level approach to duty to seek to further the purposes of the National Landscape.
May 2025	Email	National Grid shared the Outline LEMP with the National Landscape
May 2025	E-mail	National Grid shared the Outline CoCP with the National Landscape.
June 2025	E-mail	National Landscape Team provided their feedback on National Grid's approach to duty to seek to further the purposes of the National Landscape
June 2025	Meeting	Meeting with National Grid and the National Landscape Team to discuss approach to duty to seek to further the purposes of the National Landscape
July 2025	E-mail	National Grid shared draft document with National Landscapes Team setting out more detail in relation to measures proposed to seek to further the purposes of the National Landscape
July 2025	E-mail	National Grid shared updated draft document with National Landscapes Team setting out measures proposed to seek to further the purposes of the National Landscape for consultation with wider Partnership
August 2025	E-mail	National Grid provided an update on the duty to seek to further the purposes of the National Landscape and an indication of next steps
August 2025	Email	National Grid shared submission documents with the National Landscape.

Date	Format	Topic/Description
August 2025	E-mail	National Grid provided a response to National Landscape Team regarding approach to feasibility study in connection with removal of 132 kV UK Power Networks Line
October 2025	E-mail	National Grid shared Heads of Terms for legal agreement to secure measures to seek to further the purposes of the National Landscape with National Landscape Team
October 2025	E-mail	National Landscape Team shared initial comments on Heads of Terms
November 2025	Email	The National Landscape provided their relevant representations to National Grid.
January 2026	Meeting	Meeting with National Grid and the National Landscape to discuss the Statement of Common Ground and duty to further the purposes.
February 2026	Email	National Grid shared details responding to comments on the Landscape Setting Study with the National Landscape.
February 2026	Email	National Grid shared the Statement of Common Ground with National Landscapes (clean and tracked versions) for wider partnership review
February 2026	Meeting	Meeting to discuss the Statement of Common Ground following review by wider partnership.

3. Matters Agreed, Not Agreed or Under Discussion

3 Matters Agreed, Not Agreed or Under Discussion

3.1 Overview

- 3.1.1 This chapter details the matters relevant to the National Landscape which have been agreed, not agreed or are under discussion between the parties. Matters are arranged by topic (using broad headings, or EIA chapter headings where appropriate) and each matter is given a unique reference number to aid identification.
- 3.1.2 The red, amber, green status shows the level of agreement with the National Landscape. Descriptions of the different levels are summarised in Table 3.1.

Table 3.1 Agreement status for matters presented in Section 3

Status	Description
Not Agreed	Indicates a final position, where it has not been possible to resolve the issue to the agreement of both parties and there remains a difference of opinion.
Under Discussion	Indicates where issues are the subject of active on-going discussion.
Agreed	Indicates where an issue has been agreed or resolved satisfactorily to the agreement of both parties.

- 3.1.3 Engagement will continue as the Project develops and progresses through the various stages of the DCO process.
- 1.1.1 Sections that remain highlighted in yellow within these tables show points where both parties will seek to discuss and where possible agree a position in due course. The parties have been unable to do so at this stage because the relevant information is still being authored ahead of submission of the DCO application. These points will be the subject of ongoing discussion with stakeholders once the Environmental Statement and other relevant documentation is published.
- 3.1.4 Table 3.2 provides the matters agreed, not agreed or under discussion in relation to the National Landscape.

3.2 Landscape and Visual

Table 3.2 Matters Agreed, Not Agreed or Under Discussion in relation to Landscape and Visual

ID	Matter	National Grid's Position	National Landscape's Position	Status
EIA – Regulatory, Planning Policy Context and Guidance				
3.8.1	Policy and legislation	<p>The policy context, legislation and guidance considered when undertaking the Landscape and Visual assessment is presented in Chapter 2 (Key Legislation and Planning Policy Context) and Section 13.2 Chapter 13 (Landscape and Visual) of the ES.</p> <p>All relevant legislation, policy and guidance has been identified and appropriately considered to inform the assessment.</p> <p>The Planning Act 2008 (“the Act”) requires that the Secretary of State for Energy Security and Net Zero (SoS) in deciding the application for development consent must have regard to</p>	<p>Statutory consultation response stated that: <i>“The Partnership considers that development proposals should comply with local and national policy requirements”</i>.</p> <p>E-mail correspondence from 1st May 2025: <i>National Landscape Partnership recognise that the scheme is following policy in so far as where route does not avoid a nationally designated landscape it is proposing undergrounding through it which is likely to minimise visual impacts during the operational phase.</i></p> <p>There needs to be reference to the Dedham Vale National Landscape and Stour Valley Management plan in this section and how the project considers that. There needs to be reference to the strengthened s85 CRoW Act duty in this section and comment on how the Project has considered its requirements.</p>	Agreed

EIA – Approach and Methods				
3.8.7	Study area	<p>The study area for assessing Landscape and Visual was agreed through the EIA Scoping Report and the Scoping Opinion received from the Planning Inspectorate and through subsequent thematic workshops.</p> <p>The Planning Inspectorate stated in the Scoping Opinion (document reference 6.20), '<i>...that the Study Area and ZTV should represent the extent of the likely impacts from all</i></p>	<p>The study area for assessing Landscape and Visual was agreed through the EIA Scoping Report and the Scoping Opinion received from the Planning Inspectorate and through subsequent thematic workshops.</p>	Agreed

ID	Matter	National Grid's Position	National Landscape's Position	Status
		<p><i>phases of the Proposed Development (including construction, maintenance and decommissioning) and should encompass long views from within the Dedham Vale AONB'.</i></p> <p>The proposed Study Area was reviewed in light of further assessment work undertaken in preparation of the PEIR (National Grid, 2024). The emphasis of the preliminary assessment was based on landscape and visual receptors lying within 3 km of the operational overground elements of the Project and 1 km of the operational underground cable route.</p> <p>For the purposes of the ES, the LVIA Study Area has been reviewed in light of feedback received during non-statutory and statutory consultation, ongoing site surveys, and following the production of updated ZTVs as the Project has developed.</p>		

ID	Matter	National Grid's Position	National Landscape's Position	Status
3.8.8	Data sources	Sufficient desktop and survey data has been collected to inform the assessment as presented within Section 13.4 of Chapter 13 (Landscape and Visual) of the ES .	The National Landscape confirmed in a meeting on the 23 rd February 2026 to discuss the Statement of Common Ground that the National Landscape was satisfied this matter was addressed by the National Grid position and was considered agreed.	Agreed
3.8.9	Assessment methodology (including LVIA methodology)	In July 2022 National Grid shared the LVIA methodology and Arboricultural assessment methodology with the National Landscape for review. Meeting held in July 2022 to discuss LVIA methodology.	The scope of the LVIA was agreed through a technical note and meeting held in July 2022.	Agreed
3.8.10	Landscape Viewpoints (inc Locations for wireframes and photomontages.)	National Grid has shared viewpoint locations with the National Landscape and held a series of Thematic Group Workshops to discuss viewpoints. Comments received from the Planning Inspectorate in their Scoping Opinion (December 2022): * <i>"The number and location of viewpoints (representative, specific and illustrative), as well as the locations for wireframes and</i>	E-mail correspondence from 1 st May 2025: <ul style="list-style-type: none"> <i>The National Landscape Partnership note that there may be a visual impact during the operational phase due to restrictions on vegetation above any underground cables. It considers that a representative View Point be included to demonstrate any possible impacts of where the underground transmission line passes under a hedgerow or similar (perhaps a road with a hedgerow either side and a field boundary hedgerow).</i> <i>Consider at least one viewpoint on a bridleway and adapt assessment to height of horse rider (ie above standard walking height).</i> 	Agreed

ID	Matter	National Grid's Position	National Landscape's Position	Status
		<p><i>photomontages, should be agreed with relevant consultation bodies including local authorities, Historic England, NE and the AONB Partnership and be in line with relevant guidance, where possible."</i></p> <p>Specific feedback on viewpoints received from the National Landscape will be taken into account.</p>	<ul style="list-style-type: none"> <i>The National Landscape Partnership note that statutory bodies (Local Authorities and Natural England) have a responsibility to the National Landscape and consider that any views those bodies give in relation to the National Landscape are given appropriate weight.</i> <p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that the National Landscape was satisfied this matter was addressed by the National Grid position and was considered agreed.</p>	
3.8.11	Key parameters and assumptions	Key parameters and assumptions associated with the Landscape and Visual assessment are summarised in Section 13.4 of Chapter 13 (Landscape and Visual) of the ES . The key parameters and assumptions presented are considered appropriate.	The National Landscape confirmed in a meeting on the 23 rd February 2026 to discuss the Statement of Common Ground that the National Landscape was satisfied this matter was addressed by the National Grid position and was considered agreed.	Agreed
EIA – Baseline Conditions				
3.8.12	Baseline conditions and receptors	The baseline conditions and receptors for Landscape and Visual are	The National Landscape confirmed in a meeting on the 23 rd February 2026 to discuss the Statement of Common Ground that the	Agreed

ID	Matter	National Grid's Position	National Landscape's Position	Status
		presented in Section 13.5 of Chapter 13 (Landscape and Visual) of the ES . The baseline conditions and receptors presented are considered appropriate.	National Landscape was satisfied this matter was addressed by the National Grid position and was considered agreed.	
EIA – Embedded, Standard and Additional Mitigation Measures				
3.8.13	Embedded mitigation	<p>Embedded mitigation measures, designed as an inherent part of the Project relevant to Landscape and Visual effects, are set out in Section 13.6 of Chapter 13 (Landscape and Visual) of the ES. Embedded mitigation is considered appropriate and adequate, in terms of its nature and scale, to address potential effects.</p> <p>National Grid has carefully considered the request for Horizontal Directional Drilling (HDD) but has concluded that the circumstances raised by the respondent to justify trenchless techniques are not generally encountered. Much of the</p>	<p>Targeted consultation response:</p> <p><i>To meet the revised section 85 Countryside and Rights of Way Act (2000) duty the National Landscape Partnership considers that the undergrounding should be achieved through Horizontal Directional Drilling (or similar). At the very least, cable installation through Horizontal Directional Drilling (or similar) under all environments where cable installation through trenching would deliver an unnatural straight-line amenity impact on above-ground vegetation, particularly woodland and thus be detrimental to the preservation of natural beauty.</i></p> <p><i>It considers that the trenching method would have significant impacts on the National Landscape during construction and operation. If using a less intrusive method of achieving undergrounding, the National Landscape Partnership considers that this would demonstrate seeking to meet the active duty outlined in section 85 of the Countryside and Rights of Way Act (2000) as amended by the Levelling Up and Regeneration Act (2023).</i></p> <p>E-mail correspondence from 1st May 2025:</p>	Under discussion

		<p>route of the underground cable within the Dedham Vale National Landscape is through grassland or arable cropping. Whilst some hedgerows will require replacement, the interaction with any area where an unnaturally straight-line amenity impact might occur is limited as they have either been avoided or are already proposed to utilise a trenchless technique. These techniques require the excavation of large launch and receive pits and are higher cost techniques. They are proposed for areas of particular archaeological and ecological interest, crossing the River Stour, and where crossing the A12 and railway to minimise disruption.</p>	<p><i>The National Landscape Partnership has called for the use of Horizontal Directional Drilling (or similar) during construction to minimise visual impacts during this phase.</i></p> <p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that this matter was still under discussion, It was noted that the issue surrounding Horizontal Directional Drilling in the National Landscape means that this matter may remain unresolved.</p>	
3.8.14	Standard mitigation	<p>Standard mitigation measures to reduce potential Landscape and Visual effects during construction are summarised in Section</p>	<p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that this matter was still under discussion pending further review from the wider partnership.</p>	Under discussion

		<p>13.6 of Chapter 13 (Landscape and Visual) of the ES and set out in the Outline CoCP [APP-300]. The standard mitigation is considered appropriate and adequate, in terms of its nature and scale, to address potential effects.</p>		
3.8.15	Additional mitigation	<p>The consideration of additional mitigation measures are presented in Section 13.6 of Chapter 13 (Landscape and Visual) of the ES. Additional mitigation is considered appropriate and adequate, in terms of its nature and scale, to address potential effects.</p> <p>Measures to address the duty to seek to further the purposes of the National Landscape are set out in the National Landscapes – Duty to Seek to Further the Purpose Report (s85 Countryside and Rights of Way Act 2000) [APP-120]. The package of measures includes undertaking or commissioning a piece of work to look at the</p>	<p>The National Landscape Partnership considers that the current purpose of the existing 132 kV line may become redundant if the Norwich to Tilbury project is built. If this is the case then a method to secure the benefits for the removal of the 132 kV line should be considered, ideally as part of the Development Consent Order but if this is not possible by some other legal agreement. This could demonstrate meeting the obligations of section 85 of the Countryside and Rights Way Act (2000).</p> <p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that this matter was still under discussion pending further review from the wider partnership.</p>	Under discussion

		<p>feasibility of the future removal of an existing UK Power Networks 132 kV overhead line which runs through the Suffolk and Essex Coast and Heaths the Dedham Vale National Landscapes. Given the complexity and costs of removal of the line (as set out in APP-120) the extent of the proposal is to undertake a feasibility exercise and anything beyond that would be a matter for future consideration with relevant stakeholders outside the DCO process.</p>		
EIA – Assessment Conclusions				
3.8.16	Construction effects	<p>The assessment of effects during construction is presented in Section 13.7 of Chapter 13 (Landscape and Visual) of the ES. The assessment of effects during construction presented is considered appropriate.</p>	<p>Targeted consultation response (2025): <i>The National Landscape Partnership note that the revised proposals include a longer length of transmission line through the nationally designated landscape. It considers that whatever method of undergrounding that is used that this will cause a greater negative impact on the National Landscape due to increased construction area.</i></p> <p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that the National Landscape was satisfied this matter</p>	Agreed

			was addressed by the National Grid position and was considered agreed.	
3.8.17	Operational (and maintenance) effects	The assessment of effects during operation (and maintenance) is presented in Section 13.7 of Chapter 13 (Landscape and Visual) of the ES . The assessment of effects during operation (and maintenance) presented is considered appropriate.	The National Landscape confirmed in a meeting on the 23 rd February 2026 to discuss the Statement of Common Ground that the National Landscape was satisfied this matter was addressed by the National Grid position and was considered agreed.	Agreed
Draft DCO / Outline Management Plans / Mitigation and Monitoring				
3.8.18	Outline CoCP	The Outline CoCP includes all relevant construction related mitigation measures specified in Chapter 13 (Landscape and Visual) of the ES and is appropriate for managing construction impacts from the Project. The Outline CoCP was shared with the National Landscape on the 3 rd April 2025 and then a further iteration on 19 th May 2025.	No comments received on the structure of the Outline CoCP at the time of writing. The National Landscape confirmed in a meeting on the 23 rd February 2026 to discuss the Statement of Common Ground that this matter was still under discussion pending further review from the wider partnership.	Under discussion

3.8.19	Outline LEMP	<p>The Outline LEMP includes all relevant operational related mitigation measures specified in Chapter 13 (Landscape and Visual) of the ES and is appropriate.</p> <p>The Outline LEMP was shared with the National Landscape on the 3rd April 2025 and then a further iteration on 19th May 2025.</p>	<p>No comments received on the structure of the Outline LEMP at the time of writing.</p> <p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that this matter was still under discussion pending further review from the wider partnership.</p>	Under discussion
Other matters as required				
3.8.20	Landscape setting study	<p>Feedback was reviewed with a number of comments taken on board and detailed in the Errata List [XXX]. Remaining points are subject to further clarification and engagement.</p>	<p>Detailed feedback was received from the National Landscape on 11th October 2024. The comments related to where wording should be changed and removal of certain references within the document.</p> <p>The National Landscape confirmed in a meeting on the 23rd February 2026 to discuss the Statement of Common Ground that this matter was still under discussion pending further review from the wider partnership and receipt of the Errata List following Deadline 1.</p>	Under discussion

4. Confirmation of Agreement

The above SoCG is agreed between National Grid and Dedham Vale National Landscape & Stour Valley on the date specified below.

Signed for and on behalf of National Grid:

Date:

.....
